

WALL STORAGE

PRODUCT DESCRIPTION

The Roller shelf storage is a heavy-duty storage system that has been built to offer more functionalities to the Wall Storage System. It comes with a front gate and backstop and is built of standard conveyor rollers which offer endurance and malleability to the structure. The height of the shelf helps in optimizing the available storage space. The Roller shelf can be easily fixed to the Wall Storage System.

The tool storage-device system helps optimizing the storage area ensuing increase in the efficiency on the shop floor. They are convenient enough for a range of sizes of drawers which can accommodate an array of tools and related accessories.
